

How to Integrate Apps in Jira

Jira’s Atlassian Marketplace allows you to extend the platform’s capabilities by integrating a variety of useful apps for development, productivity, analytics, and more.

Step 1: Access the Apps Section

On the Jira homepage, navigate to the **left sidebar**. Click on **Apps > Explore More Apps** as shown in the snapshot below. This will open the Atlassian Marketplace.

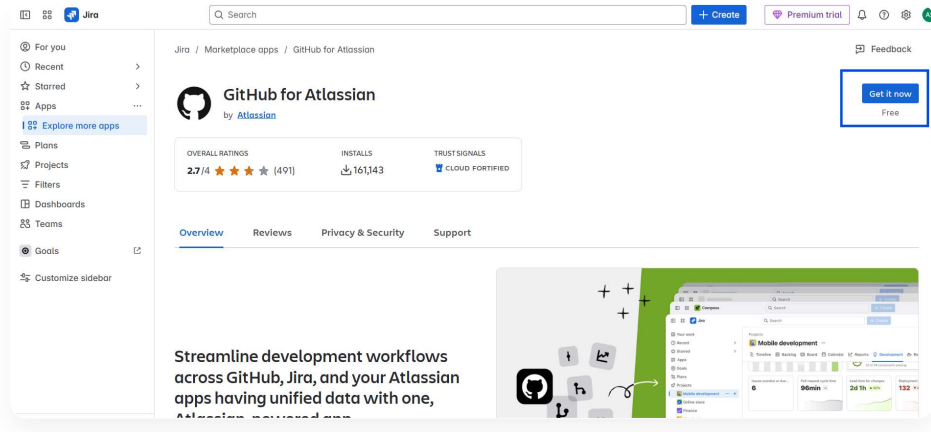

Step 2: Browse the Atlassian Marketplace

Explore a wide variety of apps based on your organization’s needs, including automation tools, DevOps integrations, time tracking, analytics, and more.

Step 3: Install the Desired App

Click on the app you wish to install, review the details, and hit **“Install”** to integrate it into your Jira instance. Most apps integrate instantly and extend your board functionalities.

Integrating apps in Jira helps boost productivity, streamline workflows, and tailor your project management experience to your team’s exact needs.
